Ljubljana, 5.12.2017

Dear Friends and Colleagues,

We would like to announce Contemporary salivary gland surgery meeting, organised by the Department of Otorhinolaryngology and Cervicofacial Surgery University Clinical Center Ljubljana, Slovenia and under the auspices of ISIAL – international sialendoscopy society. During its first two days, the meeting is conceived as a presentation of sialendoscopic and open salivary gland surgery live cases with the related panels and lectures, comprising beginners and advanced level theoretical basis. The third day is a step by step guided open salivary gland surgery hands-on course on frozen human cadavers. The meeting will be held in Ljubljana, Slovenia, 19th – 21st of April 2018 and offers a perfect update and training in salivary gland surgery.

To our great satisfaction, we will also have an opportunity to meet the most experienced in the field of salivary gland surgery from the region and also the father of modern sialendoscopy, Professor Francis Marchal. To maintain the high standard of the event, the number of participants is limited up to 50 for the first two days (sialendoscopy and open salivary gland surgery – life cases, lectures, panels) and 20 for the frozen heads hands-on course.

We are sure that many of you will take the opportunity to participate in one of the most comprehensive and interesting live surgery meetings and courses on the surgery of the salivary glands.

For more information we recommend to visit our web site at:
